### Providing ...

- **“Green”** Solutions to reduce cost and energy!
- **Digital Signage**—Merging Information distribution with Audio Visual.
- **Video Teleconference**—“For all your Video Teleconferencing needs.”
- Home of the 13’ **SKYVIEW** Projector!

**Digital Display Solutions, Inc.** is a full service audio-visual integration firm. We specialize in the design and installation of commercial A / V systems and digital signage advertising. This includes completely integrated A / V/ VTC / Control Systems for boardrooms, conference rooms, meeting rooms, training rooms and control centers.

Digital Display Solutions, Inc. offers a full array of specialty services such as indoor or outdoor digital signage, videoconferencing system installation, operation and maintenance; AMX / Crestron Control System programming; and complete service contract programs for new and existing systems or projectors.

Digital Display Solutions stays current with the latest changes in the A/V industry, including methods to conserve less energy ("Green" initiatives). New technologies and services constantly are emerging into the market. Our mission is to bring these solutions to our clients and provide exceptional service in the process.

## Products

### Energy Saver monitoring system.

Helping our city become more energy efficient one room at a time.

The more "Green", the more "Green"

you keep in your pocket!

With the price of gas and all the other commodities we use today, saving money is becoming more of a challenge for businesses. This device is setup to monitor the use of projectors and lighting in your facility from a remote location. This ability gives your facility managers the capability to remotely turn off projectors, lights and see if anyone has left the lights on. Through this inexpensive device, multiple lights and projectors can be turned of all from one location. Inclusively if someone walks out of the room and forgets to turn the lights off, you need not worry. It will turn the lights off for you! Join the "Green" initiative and be a part of the movement.

"As part of this initiative, CPS Energy is proactively pursuing the community's large energy users, such as school districts and businesses, to upgrade their facilities with the help of cost-effective rebates and incentives including lighting retrofits, thermal roof upgrades, and enhancements to heating, ventilation and air conditioning systems. Our residential customers also can benefit from this effort by taking advantage of a variety of rebates for appliances and home improvements that increase a home's energy efficiency. We also are offering rebates to both commercial and residential customers for photovoltaic solar panels and other solar improvements." (CPS Energy)

## Service

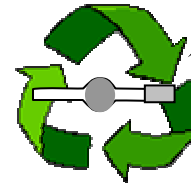

### Projector Re-lamping service.

Replacing projector bulbs for several or even 1 projector can be expensive and inconvenient when least expected. We offer several different solutions for these type of situations. Our most recent solution is extending a recycling service to our clients which reduces the expensive cost of purchasing a new projector bulb. Re-lamping is environmentally safe and reduces waste and mercury contamination.

This service provides the customer the confidence that the replacement lamp will fit their projector since they are able to recycle their original housing. Furthermore customers can relax knowing that the disposal of the mercury of these lamps are being disposed of properly by environmentally safe methods. **Certificate of compliance provided with service.** This service works well with new and *discontinued* projector lamps. No more worries about whether or not you will be able to find the correct bulb. You can now recycle and extend the lifespan of your projector!

Spent burner recycled

By recycling the original assembly parts and replacing only what you need—everyone wins!

On Site Delivery

Original reflector recycled!

Certified Mercury Disposal

**Re-Cycle / Re-Lamping**— Extend the life of your projector. Re-lamping safes you money and the environment! Re-lamped modules have same life expectancy as new lamps for 30-50% less!

> **Re-Lamp**: School ships bad lamp module to DDS re-lamping facility. Re-lamped module ships back to school within 7 days. School only pays shipping to re-lamping facility, free return freight.

> **Re-Lamp Plus** : DDS goes to school, de-installs defective lamp from projector in classroom. DDS re-lamps module, delivers and re-installs re-lamped module back in projector to within 5 days. All shipping costs included in price.

> **Lamps are cleaned, serviced and tested**

> **Certificate of proper lamp disposal provided**
